

Healthy Employees, Increased Savings

An All-In-One
Personalized
Diabetes Cost
Containment Solution
that WORKS!

WHAT IS **On-Goal** ?

On-Goal Diabetes Management is a program that assists in managing patient's adherence, education and provides cost containment. It is designed to engage and empower employees to make lasting lifestyle changes.

There are three main components to our
On-Goal Diabetes Management Program

WHY DO EMPLOYERS NEED A DIABETES COST CONTAINMENT SOLUTION?

Nationally, we are experiencing a diabetes epidemic. For employers, diabetes population healthcare costs are a top claim expenditure that continues to rise every year.

A synchronized program including testing supplies and medications with the guidance of a healthcare professional have shown proven results with up to 50-75% of increased employee engagement.

Engagement helps reduce costs for both you and your employees and, in turn, improves your organization's health physically and financially.

DIABETES SUPPLIES

Access to all major brands of diabetes supplies, including continuous glucose monitors and insulin pumps at direct pricing.

DIABETES EDUCATION

One-on-one diabetes education, mentoring and support to help make lasting lifestyle changes while managing diabetes.

MEDICATION SUPPLY PROGRAM

Mail order delivery program provides a monthly supply of medications and two follow-up calls reviewing medication therapy and progress.

EMPLOYER PROGRAM BENEFITS INCLUDE:

01 IMPROVED BENEFIT PLANS
Diabetes management programs offer higher financial benefits and can help attract and retain employees.

02 INCREASED ENGAGEMENT
Combining supplies, medication and lifestyle management; employee engagement rates range from 50-75%.

03 EASY IMPLEMENTATION
Implementation and on-boarding are simple with online enrollment through Southern Scripts portal.

04 REPORTING
Reporting is provided to measure ROI. Your return will grow as more employees enroll!

RESULTS

We have leveraged our health management expertise, select partnerships and medical supply pricing efficiencies to form comprehensive programs that help you:

IMPROVE
Population Health

DRIVE
Diabetes Education

BOOST
Employee Engagement

REDUCE
Healthcare Expenses

LOWER
Medication Costs
